

MuleSoft Manufacturing Cloud Integration Accelerator

Salesforce knowledge and MuleSoft know-how

Our Salesforce capabilities makes us uniquely qualified to use MuleSoft's advanced Anypoint platform to combine Manufacturing Cloud with any ERP, any application and any data – and to build a solution that will keep you ahead.

- Manufacturing Cloud expertise
- Proven MuleSoft experience
- Broad Salesforce capabilities

Untangle systems. Unlock insight. Improve performance.

Complex, cobbled-together IT environments create standalone solutions and siloed information, which impair productivity and make digital transformation difficult.

For companies looking to implement Salesforce Manufacturing Cloud, the key to eliminating these problems, improving operational efficiency and unleashing the full capabilities of the Salesforce platform is simple: full integration with your ERP.

MuleSoft Manufacturing Cloud Integration Accelerator leverages our advanced MuleSoft integration capabilities, extraordinary Salesforce expertise and exceptional Salesforce Manufacturing Cloud experience to untangle your connections, build conduits for your important data, and give you the information and insight you need.

Better decisions with connected systems

MuleSoft Anypoint delivers connectivity using sophisticated integrations, automations and APIs, offers the ability to make more informed decisions, and provides a single view of – and single source of – complex data.

- Manage orders effectively
- Drive operational efficiencies
- Free up IT resources

Connect your ERP to Salesforce Manufacturing Cloud.

Get the integrations you need to succeed.

MuleSoft Manufacturing Cloud Integration Accelerator offers the critical connections you need to maximize the value of Salesforce Manufacturing Cloud.

Designed to go live quickly and grow as your organization grows, this solution utilizes batch processes and APIs to integrate these five essential datapoints with your ERP:

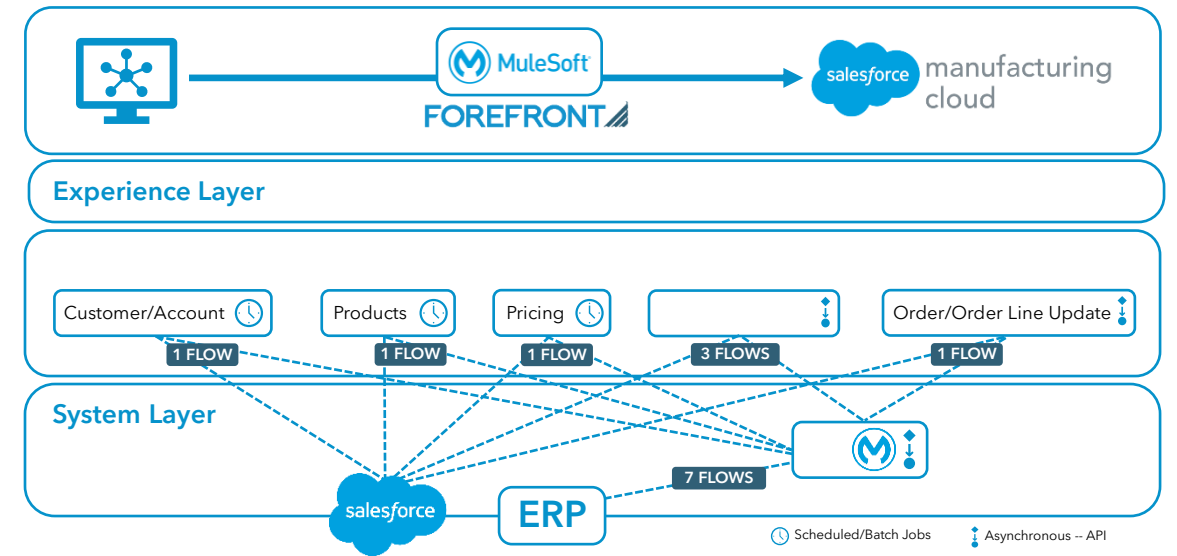

-  Accounts/Addresses
-  Products
-  Price List
-  Orders/Order Lines
-  Order Status/Order Line updates

The cost: \$90,000 (includes services and one year licensing)

Experience shows that most implementations using MuleSoft Manufacturing Cloud Integration Accelerator utilize 11 active flows for these integrations, and have volumes of 50 records per day for Account, Product and Price info, and 500 records per day for Order info.

If your requirements are greater, add-on packages offer additional integration points, flows, data, messaging and APIs.

Do you have the integrations you need to get the most out of Salesforce Manufacturing Cloud? For detailed information on scope, timeframes and costs for this scalable “quick start” solution, contact Chris Cook, VP - Manufacturing, at 412-849-8269 or ccook@forefrontcorp.com.

Salesforce Expertise and Integration Excellence

ForeFront is a global systems integration firm that provides a broad range of solutions utilizing the Salesforce Manufacturing Cloud, Automotive Cloud, Health Cloud, Revenue Cloud, Service Cloud, Commerce Cloud and Experience Cloud.

Our strong experience with, and deep knowledge of, the Salesforce multi-cloud platforms – and MuleSoft – give us the ability to solve complex challenges in the manufacturing, healthcare/life sciences, automotive, high-tech and other industries.

With offices across the United States and Europe, we work every day to keep our market-leading client companies at the forefront.
